

Guide to using the Nursing Simulation Scheduling App

The Nursing Simulation Scheduling App allows you to generate optimized weekly lab schedules for Senior, Junior, and Accelerated nursing student groups. All model parameters are configured through the **sidebar** on the left, while the **main interface** displays the solver button and the generated schedule.

The sidebar contains multiple parameter sections, so you may need to scroll to view and adjust all settings.

Model Parameters (Sidebar):

Number of Weeks: This is where we define the total number of weeks in a semester that will be used for scheduling the nursing students to the simulation. The default value is set to 12 weeks

Number of Days per Week: Specifies how many days per week simulation sessions are offered. The scheduling week runs **Monday** through **Saturday**. If set to fewer than 6 (e.g., 5), only the first 5 days are used. The default is 6.

Blocks per Day: A block represents a fixed time window (e.g., 4 hours) during which one or more labs can run simultaneously. The default number of blocks per day is set to 2.

Labs per block: Defines how many labs run concurrently within each block. The default is set to 2.

No. of Senior Groups: Total number of Senior student groups requiring simulation sessions. The default is 15

No. of Junior Groups: Total number of Junior student groups. The default is 12

No. of Accelerated groups: Total number of Accelerated student groups. The default is 15

No. of Senior Lab sessions: Total number of simulation sessions each Senior group must attend during the semester. The default is set to 4

No. of Junior Lab Sessions: Total number of simulation sessions each Junior group must attend. The default is set to 4

No. of Accelerated Lab Sessions: Total number of simulation sessions each Accelerated group must attend. The default is set to 7

Block Availability: This section defines **which days of the week each student level is allowed to attend lab.**

For example:

- **Senior** students: Monday, Wednesday, Saturday
- **Junior** students: Tuesday, Wednesday, Thursday, Saturday
- **Accelerated** students: Tuesday, Thursday, Friday, Saturday

You can adjust these availability rules using checkboxes for each day.

Block Availability (Allowed Days)

Senior

☒	M	☐	Tu	☒	W	☐	Th	☐	Fri	☒	Sa
	on		e		ed		u				t

Junior

☐	M	☒	Tu	☒	W	☒	Th	☐	Fri	☒	Sa
	on		e		ed		u				t

Accelerated

☐	M	☒	Tu	☐	W	☒	Th	☒	Fri	☒	Sa
	on		e		ed		u				t

Lab Arrangement: For each day of a week, we can define which lab is available for each block. This needs to be defined for each day of the week. The figure below illustrates the lab defined for Monday in which only the lab2 is available for block 1.

Labs Arrangement (Which Labs Run)

Mon

Block 1:

☐ Lab 1
 ☒ Lab 2

Block 2:

☐ Lab 1
 ☐ Lab 2

After all the model parameters are set, just click “Run Solver”. This will generate the schedule for each week, the section of which is illustrated below. The generated schedule can be copied and pasted to word document or can be downloaded as text file.

Weekly Schedule

Download Schedule as TXT

Week: 1

Days	Block1-Lab1	Block1-Lab2	Block2-Lab1	Block2-Lab2
Monday		Senior-Group11		
Tuesday	Accelerated-Group12	Accelerated-Group9	Accelerated-Group15	Accelerated-Group5
Wednesday	Junior-Group12	Senior-Group9	Senior-Group8	Senior-Group10
Thursday			Accelerated-Group15	
Friday	Accelerated-Group15	Accelerated-Group6	Accelerated-Group13	
Saturday	Accelerated-Group1	Junior-Group1	Senior-Group2	Senior-Group1

Week: 2

Days	Block1-Lab1	Block1-Lab2	Block2-Lab1	Block2-Lab2
------	-------------	-------------	-------------	-------------
